## **7. Business Arising from the Minutes**

### **7.1 Letter Re: Wind Turbine Taxation**

There has been no response to the letter sent to the Minister of Finance regarding the Wind Turbine Taxation letter.

It was also noted that no response from the Minister of Environment had been received regarding the letter sent in December 2021 regarding wind turbine failures. The Recording Secretary will look into this further to confirm.

Members of the Working Group feel that it would be beneficial to invite MPP Rick Byers, who is also the Parliamentary Assistant to the Minister of Finance, to the next meeting to introduce him to the Working Group and follow up on the letter.

## **7.2 Response to November 10, 2022 letter requesting quarterly reports from the MECP.**

The Working Group believes that the complaints would not be considered confidential. The request is for information regarding the complaints themselves and is not to obtain the names of who the complaint is regarding. ## **7.3 Ruby Mekker - Wind Turbines defined as a Health Hazard**

Ms. Mekker is unable to attend and this item is being deferred to a future meeting.

Chair Allwood provided some information that he had an opportunity to speak with Dr. Arra, the local Medical Officer of Health in Grey-Bruce regarding this issues. Dr. Arra indicated that he was aware of the MMWTWG and its mandates and although he finds the issues interesting, there is not the money and resources available to properly investigate the health affects.

Ms. Mekker is seeking an amendment to the original motion passed by the Working Group that indicated that a letter be sent to the local Medical Officer's of Health.

The Working Group will discuss this matter further and provide direction at a future meeting.

#### **7.4 MECP FOI Requests**

The Recording Secretary reported that the fee estimate has been paid however, no further information has been received.

### **8. Delegations/Presentations**

#### **8.1 IESO Update - Warren Howard**

Mr. Howard provided an update on the IESO.

The IESO is seeking additional capacity and has issued an RFP to obtain proposals for achieving this.

There has been some differing views on the requirement for municipal support of the proposed projects between the government and IESO. On December 23, the RFP was changed which made the municipal support requirement mandatory to the application.

There have been a number of proposals presented to Council's all over the province. Some of the questions being raised relate to location, aboriginal support and zoning. Online public consultations have also been allowed. Mr. Howard suggested that if proposals do come to local Council tables, it is important that Council asks a number of questions.

He also provided some information on the plan for decarbonization. Minister Smith requested a plan to decarbonize electricity production in Ontario. Consultations were held with more than 70 organizations. A plan was developed with 2 scenarios and there has been a positive response from the environmental sector. Mr. Howard feels that a response from both the MMWTWG and individual municipalities would be appropriate.

The plan projects that wind capacity will double which would allow them to phase out natural gas. There is no backup supply discussed for intermittent wind and solar sources. The plan also highlights a need to address decommissioning. There is the possibility that the IESO's view of needing 17,760 MW of wind

capacity by 2050 could be out of step with the government's view on the matter.

It was noted that the IESO decarbonation plan also includes a significant contribution of 15,000 MW of hydrogen generation which should also be included in any response drafted from the Working Group.

Mr. Howard also provided a brief update on the North Kent well water issues, indicating that a study was completed showing that the water contamination was linked to wind turbines. There is a local campaign to raise funds to complete further in depth testing in the area. The contamination is the result of the vibrations coming from the turbines.

Members raised questions regarding the various storage technologies that will be seen as a result of the IESO RFP, two of the main sources being lithium ion battery storage and hydrogen. The carbon footprint could be made much larger from the mining required for the production of all these batteries.

There is a storage facility proposed for Chesley. It consists of sea container type buildings full of batteries that fill up with power during the off peak times and send it back out during the peak times.

The IESO requires that the projects have the power be available on demand with 4-6 hours of continuous power so a wind turbine without storage would be able to support this demand.

It was also noted that oftentimes the benefits are examined but not always are the consequences associated with alternative energy solutions are considered.

There have been issues raised regarding fire suppression measures related to the battery storage facilities and the large quantities of water that would be required to combat a fire if it occurred.

Member Palmer offered to bring forward a presentation on battery storage facilities for the benefit of members at the next meeting in March.

Subsequent to further discussion, the Working Group passed the following resolution:

**MMWTWG-2023-05**

**Moved by:** Todd Dowd - Municipality  
of Northern Bruce  
Peninsula

**Seconded by:** Jim Hanna - Township of

## **11. New Business**

Member Murray raised the point that the group was originally formed to combat wind turbine issues, however, other issues are coming forward regarding storage facilities and other alternative energy solution.
